

# Optimizing the difficult world of Confectionaries

## to turn sweet dreams into reality

For more than two decades, Wright Process Systems has worked closely with the makers of candy, chocolate, and other sweet treats. We understand the regulations and the technical requirements of confectionary production. We know how to optimize systems for specific confectionary processes. And we back up everything with a commitment to your total process improvement.

### Wright Process Systems: Your confectionary process system solutions provider

Features of our confectionary process systems include:

- Stainless jacketed piping fabrication
- Fully "pig-able" designs
- Freezing and vacuum extrusion
- Customized product recovery systems
- Metal detection and product safety
- Tempering, de-tempering, and crystallizing mitigation
- Ingredient addition, including dairy cream injection
- Traditional and modern conching
- Powder and semi-solid conveyance systems
- Heat tracing and temperature controls
- Jacketed vessels and containers
- Recirculation loops to prevent product set-up
- Product-specific automation, cleaning and sanitation systems
- Utility distribution systems
- On-demand hot water recirculation systems

### Adaptable solutions built to your exact specifications

Our systems are designed to work with any plant configuration. All systems can be skid-mounted or secured to a plant floor, and we provide professional process and utility piping with every system install. Wright Process Systems also offers state-of-the-art automation and control panels to convert our systems into complete turnkey solutions.

### Wright Process Systems is your partner in process system success
