

Innovations in Engineering

designed to optimize your process system

With an emphasis on continuous process improvement, Wright Process Systems offers plant-wide process system engineering and industrial engineering. Our engineers build in process efficiencies at every stage, with special attention to utility systems, plant control systems (PLC, HMI, data archiving, ERP), workflow optimization, plant layout studies, material handling, packaging, and conveyance.

Wright Process Systems: Your process and industrial engineering experts

Our engineering services include:

- Complete process engineering, including system design, modification, and expansion
- Operational evaluation and operator re-training
- Code-based design (PMO, 3A, CBC, etc)
- Equipment sizing and specification
- Project bid package preparation
- Total system curve graphing
- Operational best efficiency point evaluation
- Thermal process review and improvement
- Permitted project design (general contracting)
- Creation and updating of system documentation
- Full 2D / 3D CAD design capabilities:
 - Standardized process and utility schematics
 - System and construction layout drawings
 - 3D mechanical system modeling
 - Permit-ready construction packages
 - Customer drawing updates

WRIGHT
Process Systems

Engineering • Installation • Service

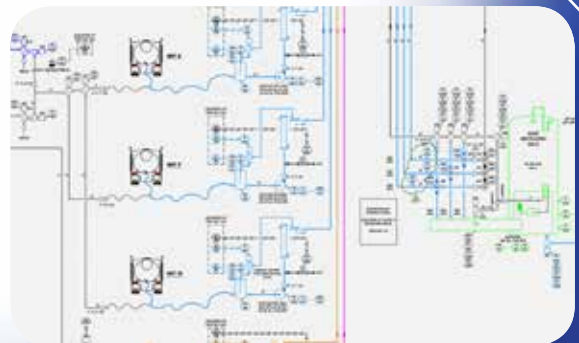

A comprehensive engineering solutions provider

With substantial in-house engineering capabilities, Wright Process Systems can save you time and money. Our experienced Engineering Division includes process engineers, project managers, mechanical draftsmen, mechanical engineers, and technicians, all versed in the latest technical tools and process design theory.

Wright Process Systems is your partner in process system success

Visit wrightps.com to learn more about The Wright Advantage, our collaborative, customer-service-centric workflow. For examples of our engineering services in action, go to wrightps.com/gallery.
